Skill Gap Report

Summary:

John Huber is a strong candidate with over 7 years of end-to-end UX design experience that aligns well with the core responsibilities of the role, including user research, journey mapping, prototyping, and design system development. His CV demonstrates a solid foundation in front-end technologies and collaboration with cross-functional teams, supported by tangible achievements. However, the CV lacks specific keywords related to the preferred modern tooling (Figma), accessibility standards (WCAG), and specific project management methodologies (Agile/Scrum, Jira) mentioned in the job requirements.

Matching Skills:

User Research & Analysis

Persona & Journey Mapping

Information Architecture & Wireframing

Prototyping & Interaction Design (using InVision)

Visual & UI Design

Design System Management

Collaboration with Product Managers & Engineers

Usability Testing & A/B Testing

Stakeholder Communication & Presentation

Design Tools: Sketch, Adobe Creative Suite (Photoshop, Illustrator)

Front-End Technologies: HTML5, CSS3, JavaScript

Responsive Design for Mobile & Web

Communication & Teamwork

Problem-Solving

Time Management

Missing Skills:

Design & Prototyping Tools: Figma (strongly preferred), Adobe XD, ProtoPie, Framer, Principle

User Research Platforms: UserTesting.com, Maze, Lookback, Miro, FigJam

User Analytics Platforms: Google Analytics, Hotjar, FullStory, Mixpanel

Accessibility Standards: WCAG 2.1

Project Management Tools: Jira, Confluence

Agile/Scrum Development Process

Familiarity with Front-End Frameworks (React, Angular, Vue.js)
